Fate and Transport of Organic Chemicals in the Aquatic Environment

Written Exam Summary

On the first day Suffet said: Let there be water. And there was water and it was good and it was the mover and shaker. On the second day he said: Let there be bursting bubbles. And he created bursting bubbles. And on the third day he said: Let the models not be reality. And they were not.

The famous 'Whitman Model' - transport mechanisms between environmental compartments

1. I should be panicking, but I don't feel like it PP.
2. So you mean like a permanent fish K.A.G
3. (Scam) YO YO MA! A.W.M.
4. If you hit a speed bump it's all over MMK
5. The idea is that I'll get more done here than at home I just have to get started. A.W.M
6. It's whatever time it says on your watch SPM
7. We're all in the same boat, and it is sinking SPM
8. We're all toxicologically challenged AWM
9. TP
10. It's biolysis Suffer/AvM
11. I hate critics loving vegetables = wind erosion
12. Rich kids like sugary cookies preferably = water erosion
13. It's Jive! We know everything
We are geniuses
We are the cream of the crop
and one day we'll run the planet
Yeah - right! AWM
14. It (better be) over! SPM
15. The 60% club,
or 4x 60% = 240% SPM/AvM
16. I'm going bald!
Jim: pe: Gym! MMK
17. I'm still Mugnie som
18. I hate that shit! AWM
19. This is fun - we should do this more often All of us
20. Let's get ready to rumble! Boxing Guy

DEVELOPMENT OF INTERMEDIA TRANSFER FACTORS AND ENVIRONMENTAL PROFILES FOR TOXIC AIR CONTAMINANTS

Eric D. Stein, Alex E. Kwan, Frank Cohen, and Arthur M. Wilner
University of California, Los Angeles
Environmental Science and Engineering Program

Background

Research Objectives

Methodology

Model Description

Table with 2 columns: Contaminant, Transfer Factor, Environmental Profile

SUMMARY

Contaminant	Transfer Factor	Environmental Profile
...

Conclusions

Contaminant	Transfer Factor	Environmental Profile
...

- RECOMMENDATIONS
- Determine effectiveness of intermedia transfer factors
 - Consider environmental factors
 - Measure and monitor intermedia transfer factors
 - Consider transfer factors in the context of overall risk assessment
 - Develop methods and modeling capabilities

**WARNING
NO SWIMMING**

SWIMMING WITHIN 100 YARDS OF THE STORM DRAIN
OUTLET IS PROHIBITED. STORM DRAIN WATERS MAY BE
CONTAMINATED WITH HUMAN DISEASE CAUSING BACTERIA
AND VIRUS OR HAZARDOUS CHEMICALS WASHED DOWN
FROM URBAN AREAS.

**ADVERTENCIA
PELIGRO
PROHIBIDO NADAR**

PROHIBIDO NADAR DENTRO DE 100 YARDAS
DEL DESAJE. LAS AGUAS DEL DESAJE
PUEDE ESTAR CONTAMINADAS CON BACTERIAS
Y VIRUS QUE PUEDEN CAUSAR ENFERMEDADES.
